A New Day for Vitamin D

Fortify your Lab with Vitamin D Testing

Tosoh Bioscience is proud to introduce the ST AIA-PACK 25-OH Vitamin D assay for use on Tosoh AIA System Analyzers. Vitamin D measurement is intended as an aid in the determination of Vitamin D sufficiency.

The antibodies have equimolar affinity for Vitamin D₂ and D₃ and the assay measures Total Vitamin D. Dry reagent format ensures 90-day calibration stability for minimal waste and cost effective testing.
Fortify your Lab with Vitamin D Testing

- The Tosoh ST AIA-PACK 25-OH Vitamin D correlates well with gold standard methods and measures 25-OH Vitamin D$_2$ and D$_3$ in equimolar proportions.
- 90 day calibration stability makes it feasible to run this test even with low volumes.
- Utilizes Tosoh’s Unit Dose Test Cup technology.
- Single, unitized test cups require no pre-mixing, no pre-measuring and no on-board refrigeration.
- Test cups are bar-coded for easy identification and inventory management.
- Assay range of 4 to 120 ng/mL.
- Assay time of 40 - 50 minutes.
- Sample type - Serum, Na heparinized plasma or EDTA plasma.
- Low CVs.
